The initiative on GMO only affects Monsanto and Mycogen (Dow)
Small farmers are PROTECTED by the initiative. (please read the law)
Citizens against the GMO Farming Ban was created by Mycogen
Monsanto and Mycogen hide behind these fake organizations

The organizations are created to confuse YOU
The organizations can lie and not get in trouble for it

Monsanto and Mycogen are chemical companies, not farmers.
GMO's were created to sell more chemicals
GMO's are designed to withstand large amounts of chemicals
Each year more Chemicals have to be used to keep growing GMOs

Conventional non-organic farming only uses 8-12 chemicals
GMO operations use 80 or more
Those 80 chemicals mix in the fields and create new chemicals
The EPA says they do not regulate or check on these new chemicals

Those chemicals don't just stay in their fields on their crops
Those chemicals spread into our waters, lands and neighborhoods
Those chemicals are in the dust and we breathe them
The State tested and found these Chemicals in ALL our surface waters
Residents have tested and find them in the tap water in their homes

Monsanto has sued more than 1200 small farmers for millions of dollars
They proudly list these law suits on their website
They list them so their investors feel safe about controlling farming
Monsanto just paid $93 Million dollars to a town they poisoned
Until the judge made them pay, they still lied about the poisoning

Is this what you want for Maui County?
Is this what you want Maui to be known for in the World?
Are you willing to risk your life on their TV Ads and propaganda
Are you willing to risk your children's lives on no testing?

Over 20,000 of us think it's Best to Test these things
Are you willing to take a stand for this land and our way of life?
Over 20,000 of us ARE Standing Up for our best possible future.
And 20,000 of us want you to join us in caring for everything.
